## Master Thesis in Mathematics

- Title *Robust Estimation in Spatial ARMA Processes*  
Adviser Dr. Héctor Allende Olivares  
Description In this work I extended the GM estimators for spatial ARMA processes. The convergence of the estimation algorithm was established. Some applications to image processing were studied.

## Ph.D. Dissertation

- Title *A Similarity Coefficient for the Association Between Two Spatial or Time Sequences*  
Adviser Dr. Andrew L. Rukhin  
Description In this work we studied the codispersion coefficient as a measure of similarity between two spatial processes. The asymptotic properties for the sample coefficient were proved for spatial autoregressive processes defined on a regular grid on the space.
